Week 2 SQL Assignment

Description

This week covered the fundamentals of SQL and how to retrieve and manipulate data using basic queries. The assignment used the `sales` database and practiced:

- Selecting specific columns from a table
- Filtering records using WHERE
- Sorting results using ORDER BY
- Limiting query results using LIMIT
- Retrieving data from different tables

SQL Queries (queries.sql)

```
-- Week 2 SQL Assignment

-- Question 1: Payments
SELECT checkNumber, paymentDate, amount
FROM payments;

-- Question 2: Orders
SELECT orderDate, requiredDate, status
FROM orders
WHERE status = 'In Process'
ORDER BY orderDate DESC;

-- Question 3: Employees
SELECT firstName, lastName, email
FROM employees
WHERE jobTitle = 'Sales Rep'
ORDER BY employeeNumber DESC;

-- Question 4: Offices
SELECT *
FROM offices;

-- Question 5: Products
SELECT productName, quantityInStock
FROM products
ORDER BY buyPrice ASC
LIMIT 5;
```
